NEPEAN HOSPITAL
INFECTION PREVENTION
WEEK 2015

‘Standard Precautions – back to basics’
Our theme for 2015 was ‘Standard Precautions – back to basics’ and was aimed at engaging with patients, visitors and health care professionals to promote Infection Prevention. Activities included.....

• Information stand in the foyer of main entrance promoting a different element of Standard Precautions each day. Samples of all the elements of Standard Precautions were displayed and we also had a glitter bug demonstration, stethoscope cleaning station, pin the PPE on the mignon and a cannulation demonstration.

• We had ambulance service, medical staff including infectious diseases and microbiology, nursing, allied health, non clinical staff, CEO, general managers, board members, patients and members of the public visiting the stand. Also not forgetting George the skeleton.

• Staff, patients and visitors were encouraged to complete a ‘missing word’ and ‘find-a-word’ competition.

• Infection Control provided a fun Trivia ‘in service’ to various wards
Stand in Southblock foyer!
