

**Mr Sami Hoisko**

Chief Technology Officer, Head of Technology,  
Asia Pacific and Japan, Nokia

Sami Hoisko is Chief Technology Officer and Head of Technology for Asia Pacific & Japan at Nokia. His expertise and focus are on the company's technology strategy and future technology creation.

Sami has more than 15 years of experience in Nokia's architecture development including experimental radio cloud, active antenna, LTE and 5G systems.

As a member of the Nokia Asia Pacific & Japan's senior leadership team, Sami spearheads regional technology and product management services.

Sami began his career as a researcher in Digital Media Institute, Tampere University of Technology. He later worked in the semiconductor industry as technical sales engineer at Texas Instruments and software team lead at Ebit. Prior to his current role, Sami was the Hardware and Computing research lead at Nokia Technology and Innovation.

Based in Singapore, Sami holds a Master of Science in Electrical Engineering and Signal Processing from Tampere University of Technology in Finland.
